June, 2025

Introduction

Introduction

- Where to get Project report template?
- How to use commands of `ecproject` package?
- How to add Glossaries and Acronyms?
- How to add bibliography?

Project template [V3.8]

How to access "Project template" zip file

Head to the following website:

<https://github.com/rvce-latex/Project-Report-Template>

ecproject package command categories

1. Document related commands
2. Report type commands
3. Student related commands
4. Guide related commands
5. Esteemed members related commands

Document Related commands

```
\title{Design and Analysis of Oversampling ADC}  
\subCode{XX367P}
```

```
→ \Department[ECE]{Electronics and Communication Engineering}
```

```
\academicYear{2024-25}
```

• IDP report doesn't consider this command.

Support for all Department: [For UG/PG Major/Minor project]

```
\Department [<short-form>]{<long-format>}
```

```
\Department[ECE]{Electronics and Communication Engineering}
```

Report Type commands

By default, the template will generate UG Major Project.

```
%\IDPProject  
%\MinorProject  
%\pgProgram  
%\DTLProject ← • Not Fully supported yet!
```

Report Type commands

To generate IPD report: Uncomment `\IDPProject`

```
\IDPProject  
%\MinorProject  
%\pgProgram  
%\DTLProject
```

Support for UG & PG report

```
%\pgProgram  
\MastersIn [<short-form>]{<long-format>}  
\pgProgramName{<Program Name>}  
  
-----  
\pgProgram  
\MastersIn[M.Tech]{Master of Technology}  
\pgProgramName{VLSI Design \& Embedded Systems}
```

To Un-comment: Short-cut key

Ctrl + Shift + u

To Comment: Short-cut key

Ctrl + Shift + T

Support for Major & Minor project report

```
%% Uncomment \MinorProject line, if the report is for  
%%      Minor project.  
%\MinorProject
```

To Un-comment: Short-cut key

Ctrl + Shift + u

To Comment: Short-cut key

Ctrl + Shift + T

Student Related commands

<code>\stuNameA{}</code>	\mapsto	<code>\stuUSNA{}</code>
<code>\stuNameB{}</code>	\mapsto	<code>\stuUSNB{}</code>
<code>\stuNameC{}</code>	\mapsto	<code>\stuUSNC{}</code>
<code>\stuNameD{}</code>	\mapsto	<code>\stuUSND{}</code>
<code>\stuNameE{}</code>	\mapsto	<code>\stuUSNE{}</code>
<code>\stuNameF{}</code>	\mapsto	<code>\stuUSNF{}</code>

Considered for PG
Major/Minor Project

Considered for UG
Major/Minor Project

Considered for IDP Project

Student Related commands

<code>\stuNameA{}</code>	\mapsto	<code>\stuUSNA{}</code>
<code>\stuNameB{}</code>	\mapsto	<code>\stuUSNB{}</code>
<code>\stuNameC{}</code>	\mapsto	<code>\stuUSNC{}</code>
•		
•		

	\mapsto	
<code>\stuNameA{ }</code>		<code>\stuUSNA{ }</code>

Guide Related commands

For Internal Guide:

```
\guideNameA{}  
\guideDesignationA{}  
\guideDeptA[]{}  
\guideOrgA{}
```

For External Guide:

```
\guideNameB{}  
\guideDesignationB{}  
\guideDeptB{}  
\guideOrgB{}
```

- For IDP/DTL/Minor Projects: Only Internal guide commands are used.
- For internal guide department, `\guideDeptA[]{} - Department Name` have to specify short form inside *square* bracket and long form inside *curly* bracket.

Esteemed Members Related commands

```
\panelMemberNameA{}  
\panelMemberDesigA{}  
\panelMemberDeptA [] {}
```

```
\panelMemberNameB{}  
\panelMemberDesigB{}  
\panelMemberDeptB [] {}
```

```
\projectCoOrdNameA{}  
\projectCoOrdDesigA{}  
\projectCoOrdDeptA [] {}
```

```
\projectCoOrdNameB{}  
\projectCoOrdDesigB{}  
\projectCoOrdDeptB [] {}
```

Esteemed Members Related commands

```
\HOD{Dr. H. V. Ravish Aradhya}  
\DeanAcademics{Dr. M.V. Renukadevi}  
\VicePrincipal{Dr. Geetha K S}  
\Principal{Dr. K. N. Subramanya}
```

Project template [V3.8]

Glossaries and Acronyms

Glossaries and Acronyms

- Glossaries
- Acronyms

Symbols like: c , τ , ϵ , etc.

For Example, $E = mc^2$ where c represents the speed of light.

LIST OF SYMBOLS

c Speed of Light

Glossaries and Acronyms

- Glossaries
- Acronyms

Sort-forms like:

IC for Integrated Circuits

FDTD for Frequency Difference Time Domain

ABBREVIATIONS

IC Integrated Circuits

FDTD Frequency Difference Time Domain

About Glossaries

1. Definition commands
2. Display commands
3. Compilation

Definition commands

```
\newglossaryentry{<Ref>}{name=<Symbol>,  
    description={<description about the symbol>},  
    type=<List type>}  
  
\newglossaryentry{rc}{name=$\tau$, description={Time constant},  
    type=symbolList}
```

```
\newacronym{<Ref>}{<Short-Form>}{<Expanded Form>}  
  
\newacronym{ic}{IC}{Integrated Circuits}
```

Display commands

<code>\gls{<Ref>}: \gls{rc}</code>	\mapsto	τ	when it first appears ↓
<code>\gls{ic}</code>	\mapsto	Integrated Circuits (IC)	
<code>\gls{ic}</code>	\mapsto	IC	← After it's first usage

Variants:

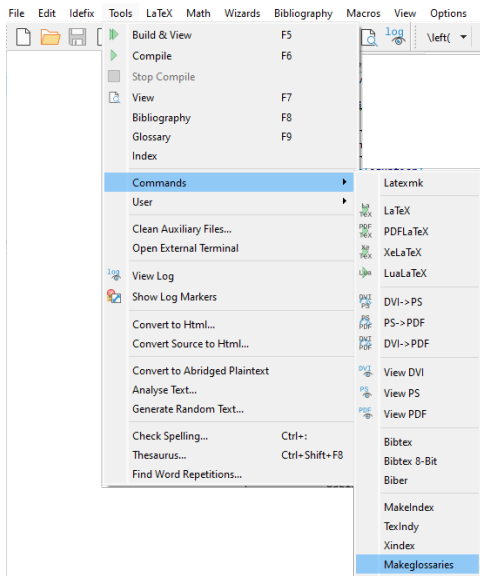

`\glspl{}`, `\Gls{}`, `\acrfull{}`, `\acrshort{}`, etc.

For more info:

<https://en.wikibooks.org/wiki/LaTeX/Glossary>

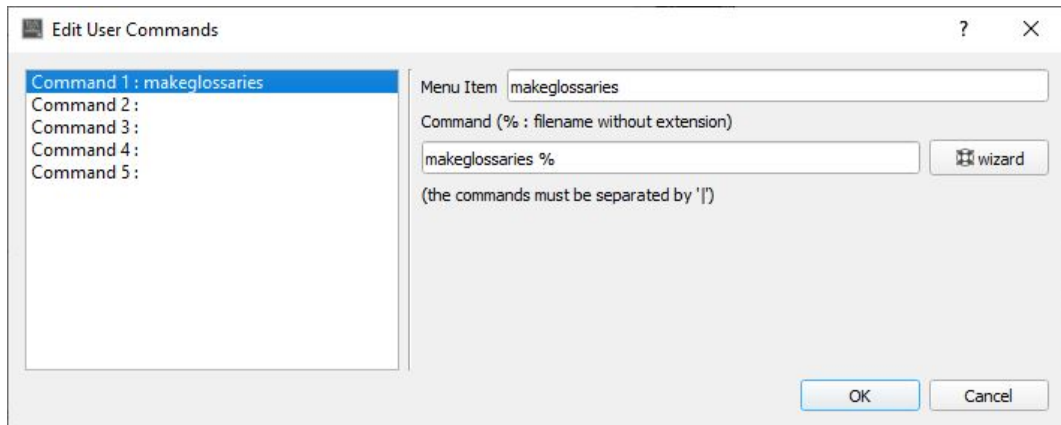

Compilation in TeXstudio

In TeXstudio, go to: Tools \mapsto Commands \mapsto Makeglossaries

Compilation in TeXstudio

In TexMaker, go to: User \mapsto User commands \mapsto Edit User commands

Compilation in TeXstudio: Run

Sequence of execution:

1. ▷ Quick Build (or) [F1]
2. ▷ 1: makeglossaries (or) [Alt + Shift + F1]
3. ▷ Quick Build (or) [F1]

Project template [V3.8]
Bibliography

Bibliography

Need of an open source software: **JabRef**

<https://www.jabref.org/download/win>

Download JabRef Windows Installer.
Install for all users.

Setting in TexMaker:

1. Ensure that the path of Biblatex is set appropriately

Goto Options \mapsto Configure TexMaker \mapsto Commands \mapsto bbib(la)tex

In my case:

"C:/Program Files/MiKTeX 2.9/miktex/bin/x64/biber.exe" %

- ## 2. Change the Quick Build option to

PdfLatex + Bib(la)tex + PdfLatex (x2) + View Pdf

ProjectBib.bib

1. Open ProjectBib.bib file under AuxFiles folder in JabRef
2. To add references, use Ctrl + n - which brings Entry window
3. Under ID-based entry generator frame, select appropriate ID type
 - DOI: For articles/papers/book chapters
 - ISBN: For books

Else use the appropriate option to manual enter the references

4. Select the entry and copy the reference using `Ctrl + k`
5. Paste the reference into the content section appropriately.
6. Run the Quick Build
